We’ve been adding beauty & value to American homes for over 60 years.

Founded in 1952, the Farley Window Company has never strayed from its mission: simply put, to design and manufacture long-lasting, value-added quality windows for American homes.

Over the years, window technology has evolved dramatically, and Farley has always been at the forefront. Today, we proudly introduce vertex3, featuring the latest advancements in glass technology, energy-efficient design and exclusive Air Sealing Technology from the world leader in insulation, Owens Corning®.

Available in a wide range of styles, colors and finishes, each and every Farley Window is unconditionally backed by the best warranty in the business: Farley for Life. All components, from glass to frame to hardware, are guaranteed for life, no questions asked – including stray pitches. Proof that we’re proud of our product, and that we want you to be proud of your purchase.

Featuring the best warranty in the industry.

We take great pride in our craftsmanship and manufacturing processes, and we offer the best warranty in the industry to back it up. The Farley Lifetime Warranty covers all components including insulated glass, frames, sash and hardware.

Our unique, no questions asked warranty is fully transferable at no additional charge. Learn more about the full Farley for life warranty, visit us on the web at www.farleywindows.com

- LIFETIME COVERAGE ON ACCIDENTAL GLASS BREAKAGE.
- LIFETIME COVERAGE ON ALL HARDWARE.
- LIFETIME COVERAGE ON SEAL FAILURE.
- LIFETIME COVERAGE ON FRAME VINYL & VINYL SASH COMPONENTS.
- FULLY TRANSFERABLE AT NO EXTRA CHARGE.
- NON-PRORATED, FULL LIFETIME COVERAGE.
Hung windows have sashes which slide up and down, offering a classic look. On a single hung window, the bottom window sash is operable; on a double hung window, both the top and bottom window sashes are operable. Operating sashes tilt inward to facilitate cleaning.

Casement windows are hinged on the side and provide a contemporary look with unobstructed views. Casements are extremely energy efficient and are the most efficient in preventing air infiltration as they close inward and form a tight seal with multi-point locks. Fixed casement windows pair beautifully with casement and awning units as they share the same profile.

Fixed picture windows do not operate and offer more glass area than fixed casement windows. Architectural windows are fixed windows which are available in an extensive range of custom shapes and sizes. Architectural windows are the ultimate expression of creativity and individuality and create a truly one-of-a-kind look.

Slider windows have sashes which slide side-to-side and are our best all-purpose window. Sliders have pleasant sight-lines and can be an economical option.

Awning windows provide a contemporary look and are hinged on the top, meaning that you can let the fresh air in rain or shine! Awnings are extremely energy efficient and are the most efficient in preventing air infiltration as they close inward and form a tight seal with compression weather stripping.

Bay and bow windows are a set of windows which are mullioned together into an arch. Bay windows come in standard configurations of 30 or 45 degrees (3 units); bow windows come in standard configurations of 10, 20, or 30 degrees (4 or 5 units). Bay and bow windows allow for a beautiful window seat.

Why we are the best.

Every Farley window lets you capture your style, bring the light in and keep the elements out. That’s simply what we do. All of our windows are made with care and dedication to excellence. You will always get the best window we can make because you deserve nothing less.

ENERGY STAR®
Farley Windows meet or exceed Energy Star® most severe standards. For more details on our energy performance data, please visit: www.farleywindows.com

INTERCEPT® ULTRA WARM-EDGE SPACER SYSTEM
The best combination of durability, rigidity and thermal performance, resulting in longer-lasting and more energy-efficient windows

EC TECH
Patented EC TECH Technology reduces water spots by 99%, creating a crystalline glass clarity

FULLY WELDED SASH & FRAME
Fully welded sash and frame for a stronger and more durable window

OWENS CORNING® AIR SEALING TECHNOLOGY
Reduces the risk of air or water infiltration and provides a mold resistant seal

The secret’s in the glass.

Farley’s proprietary vertex³ high-performance glass technology is engineered to provide superior thermal efficiency, superior glass clarity and superior air infiltration protection.

**vertex³**
HIGH-PERFORMANCE WINDOW TECHNOLOGY

**Farley’s proprietary vertex³ high-performance glass technology**

- **Thermal Efficiency**: Outperforms the industry standard by 29%
- **Glass Clarity**: Reduces water spots by 99%
- **Air Infiltration Protection**: Cuts drafts by up to 24%

**Proprietary ëvolv Glass Technology**

This technology provides triple-pane thermal efficiency in a double-pane window by reflecting escaping heat back into the room, increasing thermal efficiency by up to 29% above industry average, which adds up to substantial energy savings.

**Patented EC TECH Technology**

This technology produces cleaner, clearer windows. The titanium dioxide coating absorbs the sun’s UV rays, loosening dirt particles and allowing water to rinse them away naturally. Water spots are reduced by 99%, creating crystalline glass clarity.

**Industry-leading Owens Corning® Air Sealing Technology**

This technology offers unmatched air infiltration protection, cutting drafts by up to 24% with a mold resistant seal and guaranteed for life.

**AlumHybrid: The best of both worlds.**

Extruded aluminum exterior joined to the PVC interior structure. Extruded aluminum goes up to the center of the 4-9/16” frame and tucks into the PVC frame to increase air and water tightness. PVC sash surrounds the glass for better air and water tightness. Available in Casement, Awning, Fixed Picture Bay & Bow models.

**Features**

- Extruded aluminum exterior joined to the PVC interior structure.
- Extruded aluminum goes up to the center of the 4-9/16” frame and tucks into the PVC frame to increase air and water tightness.
- PVC sash surrounds the glass for better air and water tightness.
- Available in Casement, Awning, Fixed Picture Bay & Bow models.

**Exterior Profiles**

Farley provides a range of exterior options and capabilities to make your windows a beautiful feature of your home.

**THE STRENGTH & BEAUTY OF ALUMINUM COMBINED WITH THE ENERGY EFFICIENCY OF VINYL**

Our state-of-the-art AlumHybrid window features an exterior frame made of extruded aluminum joined to an interior frame made of rigid PVC. AlumHybrid delivers the strength and beauty of aluminum and the energy efficiency of vinyl. It is simply the best of both worlds without any compromise.
Chroma VX technology is based on a specific blend of urethane and acrylic polymers. This proprietary process provides a beautiful rich, low gloss, smooth finish that will last throughout the years.

Chroma VX, an exclusive technologically advanced formulation enhances weatherability and is compliant with the highest standards of AAMA.

Our versatile color system allows you to add any of our window colors (below) to your window’s exterior, while leaving the interior finish a neutral white.

The woodgrain color palette of our interior window frames will give warmth and depth to any room. The elegant woodgrain finish can enhance the view and draw the eye outside. Their superior functionality and versatility, along with their elegant look and classic hues, will inspire unique design options to complement any home.
Options & Hardware.
